Chart.js | cURL | Postman
Node.js | Unix CLI
Version Control w/Git & GitHub

Fluent English & Spanish

Conversational Portuguese, Russian, & A.S.L

ABOUT ME

A full-stack Software Engineer with a foundation in theoretical Linguistics, and an ardent community advocate; I strive to understand the nuances of abstract systems and utilize them in accessible & effective ways. I've developed a passion for accessible, dynamic, and efficient code and am thrilled to both explore the productive power of software and be part of its immense impact in our world.

In my free time I'm also a MMA fighter (JiuJiteira) & Ballroom Dancer; a moral philosophy & world history buff; and an (endearingly?) enthusiastic home chef!

GENERAL ASSEMBLY / Software Engineering Apprentice

JAN 2020 - APRIL 2020, BOSTON MA

500+ hour, 12 week Software Engineering Immersive program with intensive instruction in front and back end development; traversing a number of programming languages and technologies. Additional self-study introduced Machine Learning and AI fundamentals.

- ❖ **SUBIDOS / Image Hosting Application**
a full stack virtual file system with ownership functionality
TECH : HTML, CSS/Sass/Bootstrap, JS, AJAX, jQuery, Handlebars, Express, Postman,
- ❖ **MOOD TRACKER / Full Stack SPA**
a full stack application utilizing a custom, RESTful API
TECH : HTML, CSS/Sass/Bootstrap, JS, AJAX, jQuery
Ruby on Rails, SQL, RSpec, Handlebars, cURL, chart.js
- ❖ **TIC-TAC-TOE WEBGAME / Dynamic SPA**
dynamic, authenticated web app which communicates to a provided backend; built to someone else's specifications
TECH : HTML, CSS/Sass/Bootstrap, JS, AJAX, jQuery
- ❖ **JS-CALC! / JavaScript Calculator App**
a mobile-first designed front-end application to emulate your favorite 90s style calculator! (find the easter egg yet?)
TECHNOLOGIES : HTML, CSS/Sass/Bootstrap, JavaScript
